## Content subjects

Do you want to discover the secrets of the audiovisual world and be professionally involved in content creation? From music programs to TikTok videos and game shows to Videoland reality series?

In the Audiovisual Productions minor, the emphasis is not on writing reports but on creating and working in professional practice: filming, editing and working in the studio. You develop your own AV format, produce your own concept, film a pilot and pitch it to broadcasters and production houses. How do you reach your audience and ensure you stay within budget? How do you sell your concept and how do you contribute to society with your idea?

For everyone with passion, strategic insight and the courage to push their own boundaries.

## Learning outcomes

### Production

The student:

- Coordinates and supervises the production process, using a method/theory for process monitoring
- Converts creative ideas into tangible media products and uses resources appropriate to the final product
- Represents all interests during the production process, and coordinates and manages the production process as expected from a production manager
- Monitors and coordinates the (business and production) preconditions during the production process.

### Marketing

The student:
